Work experience

Senior Front End Developer

Sept 2022 - Present

Loblaw Digital

- Set up a gitlab test coverage badge that indicates our codebase test coverage which saves teams time to get codebase coverage.
- Worked on integrating Single Sign on on PC Optimum Web App which helps Loblaw users easily navigate through the suite of Loblaw's app there by reducing user churn and help the product team acheive its active weekly users target.
- Lead a team of front end developers and help uphold the team's agreed standards when reviewing merge requests and also help unblock teammates hence helping the team achieve its sprint goals.
- Introduced the team to React Testing Library and hence helped the team migrate away from Enzyme testing library.
- Meet with stakeholders and help with prioritization and estimation of stories to help achieve product team's objectives.

Senior Front End Developer

Jun 2020 - Aug 2022

Crossover Health, Orange County, California

- Leading a team of front end developers and upholding the team's agreed standards when reviewing merge requests and setting up git hooks.
- Converting mockups built with Figma by the product designers into HTML5, CSS , leading to an engaging experience after consuming the backend resources using React-Query,Typescript,Redux.
- Collaborating with the product managers on pointing of stories and assignment of stories to team mates.
- Improved the latency of the dashboard and increase the speed to our over 400,000 eligible employees by working with the backend developer and product designer on payload optimisation and component redesign
- Implemented Mock service workers to reduce wait times for my fellow front end developers while we wait for backend developers to finish working on APIs.

Senior Front End Developer

Nov 2019 - Jun 2020

Etranzact

- Converted mockups from product designers to an application Payoutlet which helps thousands of merchants with collection of payments from their millions of customers using HTML, CSS, React, Typescript.
- Collaborated with other front end developers and ensured we kept to engineering standards by writing both unit tests and integration tests (using Jasmine and Cypress)
- Participated in A/B testing of features in collaboration with product design team.
- Help back-end developers with coding and troubleshooting
- Collaborate with designers to create clean interfaces and simple, intuitive interactions and experiences.
- Joined client meetings to learn about development of project scopes.

Senior Front End Developer

July 2018 - Nov 2019

ActiveEdge Technologies

- Collaborated with product designers and product managers on building a settlement application that processes different payment processors files using React, Redux and Typescript for different analytics purposes.
- Containerized the application using (docker and docker-compose) for ease of portability across different systems
- Set up the git flow for the front end team.

Front End Web Developer

June 2017 - April 2018

Parkway Projects

- Develop new user facing features
- Ensure the technical feasibility of UI/UX designs

- Optimize application for maximum speed and scalability by compressing and minimising files and scripts before being injected into the html thereby reducing download sizes for users
- Collaborate with designers to create clean interfaces and simple, intuitive interactions and experiences.
- Carry out quality assurance tests to discover error and optimize usability.
- Joined client meetings to learn about development of project scopes.

Front End Web Developer (Lead Developer)

August 2016 - May 2017

Riby

- Manage large, complex design projects for corporate clients e.g BankOfIndustry (BOI) Agent Aggregator Management Platform
- Develop project concepts and maintain optimal workflow
- Collaborate with designers to create clean interfaces and simple, intuitive interactions and experiences.
- Carry out quality assurance tests to discover error and optimize usability.
- Joined client meetings to learn about development of project scopes.
- Oversee scheduling of project milestones and coordinated with clients on any proposed changes or challenges to overcome.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.
- Implementing new features on the platform.

FullStack Developer

April 2015 - June 2016

Truppr

- Participate in the design of the web application
- Implement various parts of the application using HTML5, CSS, JavaScript, Node.js / Express.js, Ember.js
- Work with outside data sources and API's e.g Spotify API, Google Places API, Facebook API, twitter API.
- Work on bug fixing and improving application performance.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.
- Writing cross-browser compliant HTML, CSS & JavaScript
- Simultaneously managing several databases and reporting tools.
- Developing and maintaining the front end and back-end functionality of websites.
- Providing technical support to end users.
- Provide guidance to other team members on web development issues
- Developing websites that have a consistent feel and look throughout all web properties.
- Addressed cross-browser compatibility issues
- Integrated websites with Facebook, Twitter.

Core Competencies

- HTML
- CSS
- Javascript
- Angular.js
- Ember.js
- React.js
- Redux
- Node.js
- Express.js
- SQL
- Angular 2+
- Typescript
- Docker
- Jest + Enzyme
- Cypress

- React Native
- Agile Methodology
- Storybook
- Cypress

Education

Bachelor of Science

2007 - 2012

University of Lagos Akoka

Systems Engineer

Career Development

- NiiT - Advanced Certificate in Information and Technology
